Muhammad Shahbaz Khan

Data Analyst

muhammadshahbazkhan021@gmail.com 03280892922 muhammadshahbaz-khan-analyst
muhammadshahbazkhan021-create Portfolio

Summary

Data Analyst with 1 year of hands-on experience and internship experience, skilled in Python, SQL, and Excel. Google Data Analytics certified, with expertise in data cleaning, exploratory data analysis, statistical analysis, and extracting actionable business insights. Experienced in building machine learning solutions using Scikit-learn, FastAPI, and Streamlit.

Education

BSIT — University of Southern Punjab, Multan *Aug 2021 – Oct 2025*
GPA: 3.7 / 4.0

ICS (Intermediate) — Emerson University Multan *May 2019 – Jun 2021*
HSSC Score: 823 / 1100

Technical Skills

Tools:	Excel, SQL, Jupyter Notebook, Visual Studio Code, Git, GitHub
Languages:	Python (Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn), SQL
Expertise:	Data Cleaning& Transformation,Data Visualization,Relational Databases,Machine Learning
Machine Learning:	Regression, Classification, Scikit-learn, Model Evaluation & Tuning
Mathematics:	Statistics, Probability
Backend & APIs:	FastAPI, REST API Development,Docker

Experience

Data Analyst Intern — CodeAlpha *(Remote)* *Jun 2026 – Aug 2026*

- Built interactive Power BI dashboards to visualize key business metrics and performance trends.
- Performed end-to-end data cleaning and transformation to ensure accurate, analysis-ready datasets.

Data Analyst Intern — DecodeLab *(Remote)* *Jun 2026 – Jul 2026*

- Conducted thorough data cleaning and exploratory analysis to surface meaningful business insights.
- Designed charts and visual reports to communicate findings clearly to stakeholders.

Certifications

- **Google Data Analytics** *(Google)*
- **Google Advanced Data Analytics** *(Google)*
- **Microsoft Power BI Data Analyst**
- **IBM Data Science Professional Certificate**
- **Applied Data Science Specialization**

Projects

Customer Churn Intelligence Platform *Python, Scikit-learn, FastAPI, Streamlit, Docker*

- Built an end-to-end churn prediction pipeline covering data cleaning, EDA, feature engineering, and classification model evaluation using ROC-AUC.
- Developed a modular application with FastAPI, database integration, and unit and integration tests.
- Built an interactive Streamlit application for customer analysis and real-time churn prediction, and containerized the application using Docker.
